ECOLOGICAL SIGNIFICANCE

ECOLOGICAL SIGNIFICANCE

Ecology enriches our world and is crucial for human wellbeing and prosperity. It provides new knowledge of the interdependence between people and nature that is vital for food production, maintaining clean air and water, and sustaining biodiversity in a changing climate.

Governments and citizens around the world are increasingly aware of the consequences of atmospheric pollution and climate change. In large-scale

Production of Plastic Goods- Currently our society creates a great deal of waste and much of that waste consists of plastic. According to the Environmental Protection Agency (EPA) in 2010 alone 31 million tons of plastic waste was created. This waste ends up all over the globe in both land and water, a good example is the Great Pacific Garbage Patch.

Tribute to Sundarlal Bahuguna

Sunderlal Bahuguna (9 January 1927 – 21 May 2020) was an Indian environmentalist and Chipko movement leader. The idea of the Chipko movement was his wife's. He fought for the preservation of forests in the Himalayas. He dedicated his entire life for the protection of nature. He brought awareness among people. He walked through Himalayan forests and hills, covering more than 14,700 kilometres on foot to protect forests.
